ESTABLISHED 2013

Company Overview

Manjaro Stainless Steel Installations is an industrial construction and fabrication company specialising in stainless steel and carbon steel pipe installations, general factory maintenance, mechanical installation and steel fabrication. We support clients across food and beverage, manufacturing and general industrial environments with practical, quality-focused solutions.

Our growth has been built on dependable workmanship, hands-on project execution and a commitment to completing work safely, efficiently and to a consistently high standard.

VISION

To uplift and develop the next generation of South African artisans by creating opportunities to gain practical skills and industry experience.

MISSION

To execute every project with disciplined planning, sound project-management principles, quality workmanship and a strong commitment to client requirements.

Stainless steel pipe welding

Large-diameter pipework

What We Bring to Every Project

- Hands-on industrial fabrication and installation experience
- Capability across stainless steel, carbon steel and mild steel work
- Factory maintenance, modification and upgrade support
- Pipework, steam systems, structural steel and machine installations
- Flexible support for planned projects, upgrades, shutdowns and maintenance work

Our Services

Manjaro Stainless Steel provides fabrication, installation and maintenance services for industrial and factory environments. Our core capabilities include:

Mechanical & Pipework

- Stainless steel piping
- Carbon steel piping
- Steam piping
- Butt-fusion welding of HDPE pipelines
- Arc welding of large-diameter steel pipelines
- High-compression air-line installations

Fabrication & Structural

- Stainless steel fabrication
- Mild steel fabrication
- Boilermaking
- Steel structures and supports
- Tanks, hoppers and custom steelwork
- Machine guards, platforms and general fabrication

Factory & Project Work

- General factory maintenance
- Machine and equipment installation
- Factory upgrades and modifications
- Pump stations
- Heat exchangers
- Conveyor and production-line support

Fabrication weld

Pipe fabrication

Structural steelwork

Clients & Industry Experience

Our project experience includes work for food manufacturers, textile operations, construction companies and general industrial clients. Previous clients listed in the original company profile include:

JMV Textiles	Packo Foods	Pro Nutrition
Mighty Meats	Solar Sport	SMV Trust
Rambros Construction	Royal Green	Corona Foods

Project Experience

Client	Project	Scope of Work
JMV Textiles	Fabric dye machine installation	Installation of dye machines including process pipework, steam lines and chemical pipe installations.
Packo Foods	Steam retort modification & canning upgrade	Modified the manual operating system to an automatic operating system and supported the canning-department upgrade.
Pro Nutrition	General factory maintenance	Installation of whey-powder blenders and associated factory work.
Mighty Meats	Machine installation	Installation of sausage smoker machines.
Solar Sport	Boiler installation & steam piping	Installed boiler-related pipework serving fabric irons and fabric dryers.

Client	Project	Scope of Work
SMV Trust	Air-line installation	High-compression pipe installation.
Rambros Construction	General steelwork / structures	Fabrication and installation of general steel structures.
Royal Green	Factory upgrade	Installation/support of an automated conveyor system.
Corona Foods	Hotwell tank installation	Fabrication and installation work associated with a hotwell tank.

Selected Project Gallery

Examples of completed and in-progress industrial work from the company's project portfolio.

JMV Textiles - Fabric dye machine

Packo Foods - Steam retort modification

Packo Foods - Canning department upgrade

Packo Foods - Process equipment and pipework

Fabrication & Installation Gallery

Fabricated industrial steel structure

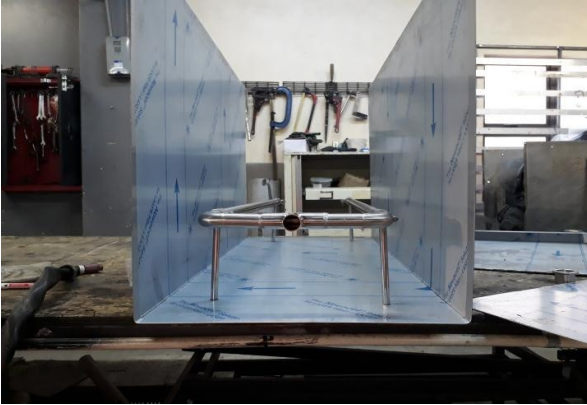

Structural installation in progress

Mighty Meats - Machine installation

Food-production equipment installation

Corona Foods - Hotwell tank fabrication

Stainless steel fabricated unit

Stainless steel fabricated unit and pipe connection

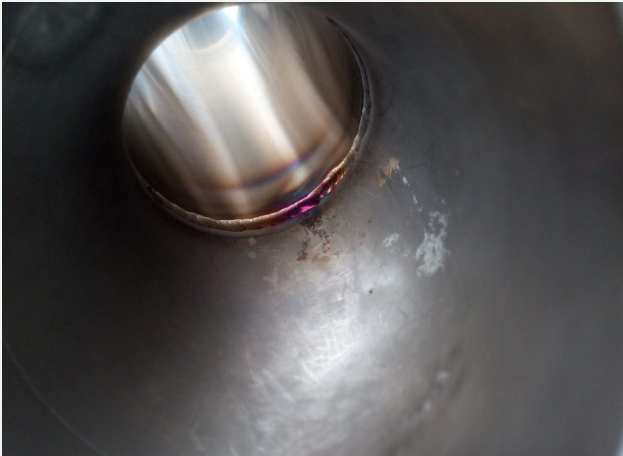

High-quality TIG weld finish

Featured Fabrication Work

Stainless-steel equipment fabricated and installed for hygienic processing environments.

Precision stainless-steel welding

Process tanks and extraction canopy

Integrated processing platform

Access platform and stainless-steel vessels

Pump, pipework and equipment installation

Plant & Pipework Installations

Completed vessels, pumps, platforms and process-piping installations.

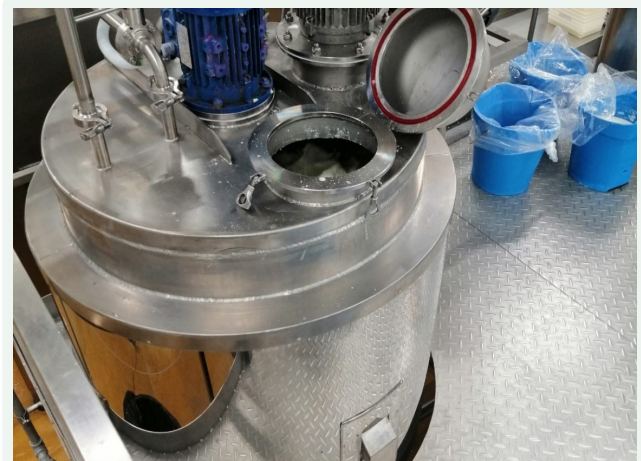

Hygienic stainless-steel pipework

Process-line piping and pump assembly

Stainless-steel tanks and support structure

Agitated process vessel installation

Processing equipment and control system

Why Choose Manjaro Stainless Steel?

Industrial Experience

Practical experience across food, textile, construction and factory environments.

Broad Capability

One contractor for pipework, fabrication, boilermaking, structural steel, installations and maintenance.

Quality Workmanship

A strong focus on weld quality, fit-up, finishing and reliable project delivery.

Responsive Support

Available for project work, factory upgrades, maintenance requirements and site-based support.

Client-Focused Execution

We work to understand the scope, coordinate site activities and deliver according to project requirements.
